DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-16, drawn to trouble shouting call at a test station using caller ID, classified in class 455, subclass 423.
- II. Claims 17-38, 44-57, drawn to executing test process, classified in class 455, subclass 423.
- III. Claims 39-43, drawn to granting or denying access to computer, classified in class 455, subclass 411.
- IV. Claims 58-62, drawn to structure of the test station, classified in class 455, subclass 424.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are

distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as hardware of the test system. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
